HARDWARE

HARDWARE DETAILS

ALLOY HINGE

Ultra thick bearing hinge design allows for a full 180-degree opening, making it easy to move large objects in and out. It offers strong support, preventing deformation.

FRAME

Featuring an anti-pry design with a stepped, rounded edge and a double-layer anti-pry structure, it ensures enhanced security while maintaining a visually appealing look.

SEALING STRIP

Double soundproof sealing strips are fitted to the door frame, for providing superior noise reduction.

LOCK

Equipped with multi-lock tongue technology, the structure ensures precise locking for enhanced security and superior anti-theft protection.
